DESIGNER // DEVELOPER

## statement

I strongly believe that creating with respect to both aesthetic and function in equal measure are central to the success and joy gained from my work. I appreciate being surrounded by people who support each other through constructive feedback. I look forward to working for a company that encourages me to continue learning as well as explore the role of mentoring. I hope to find a workplace in which I am encouraged to use my imagination and inspired to experiment with the realm of possibilities.

## hard skills

OOP Web/Print Layout HTML / CSS JS  
Adobe CS6 Ruby & Rails Postgres / MySQL  
Agile JQuery / Ajax RESTful PhoneGap  
RSpec / Jasmine Sinatra UX JQ Mobile  
API consumption & development Logo Design

## soft skills

Growth Mindset Constructive criticism Sales  
Full of ideas Articulate Positive but realistic  
Adaptable E.Q. Fail & succeed gracefully  
Pair programmer Enjoy mentee & mentor role  
Function well under stress Team Building Exp.

## projects

- Halle** Mobile app designed for driver-sourced information on parking spaces
- A JS front-end with Rails-API back-end built with Firebase, PhoneGap, JQ Mobile, Oauth & Google maps to bring users a live updating & true mobile experience.
- Timely** Productivity Chrome extension for time management & awareness
- Created to explore chrome development and learn running background processes.
- Cheese Grill** Complete branding for conceptual grilled cheese food truck company
- Explores web, print and product branding through user stories and experience.
- Sourcery** Github based search portal for finding & filtering open source projects
- Inspired by a need to cultivate an interest in contributing to open source projects.
